2. Immediately when ready, shake out unpopped kernels.
3. Add salt and pecorino and shake.
4. Remove cover and allow to cool for 1 min.

It is a day to highlight the importance of fresh water and managing fresh water resources in a sustainable way.

One of the biggest concerns with fresh water is the amount of microplastics that contaminate it.

Microplastics

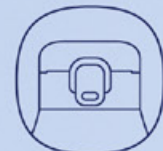

bind to chemicals that can cause cancer

can also carry toxins into the body

Tupperware products help reduce microplastics in our water, promoting better health and a healthier environment.
